1. BEFORE YOU BEGIN

- What Is Included**
- Rogue R1X Spot
 - Neutrik® powerCON® power cord
 - 2 Omega brackets with mounting hardware
 - Quick Reference Guide

Claims Carefully unpack the product immediately and check the box to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Manual Conventions

Convention	Meaning
1–512	A range of values in the text
50/60	A set of mutually exclusive values in the text
<SET>	A button on the product's control panel
Settings	A product function or a menu option
MENU>Settings	A sequence of menu options
1–10	A range of menu values from which to choose in a menu
Yes/No	A set of two mutually exclusive menu options in a menu
ON	A unique value to be entered or selected in a menu

Symbols

Symbols	Meaning
	Critical installation, configuration, or operation information. Failure to comply with this information may cause the product not to work, damage third-party equipment, or cause harm to the operator.
	Important installation or configuration information. Failure to comply with this information may keep the product from working.
	Useful information.

The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

Safety Notes

Read all the following Safety Notes before working with this product. These notes include important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained Chauvet certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect this product from its power source before servicing.
- Always connect this product to a grounded circuit to avoid the risk of electrocution.
- Do not touch this product's housing during operation because it may be very hot.
- This product is for indoor use only! To prevent risk of fire or shock, do not expose this product to rain or moisture. (IP20)
- CAUTION: When transferring product from extreme temperature environments, (e.g. cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- This product weighs 37.6 lb (17.1 kg). Always ask for help when mounting this product to avoid personal injuries or damage to the product.
- Make sure there are no flammable materials close to this product while it is operating.
- Always carry this product by the handles. Do not carry from the head.
- When hanging this product, always secure to a fastening device using a safety cable.
- Always make sure you are connecting this product to the proper voltage in accordance with the specifications in this manual or on the product's specification label.
- Never connect this product to a dimmer pack or rheostat.
- Never disconnect this product by pulling or tugging on the power cable.
- Do not operate this product if you see damage to the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- Do not aim this product toward the Sun. The lenses could concentrate the solar energy and cause internal overheating.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at a higher temperature.
- In case of a serious operating problem, stop using this product immediately!

Operation

In the unlikely event that your Chauvet product may require service, contact Chauvet Technical Support.

2. INTRODUCTION

Description The Rogue R1X Spot is a compact, electronic, moving yoke product equipped with a 170-watt LED. It includes 1 color wheel with 8 colors plus white and 2 gobo wheels for gobo morphing. It also includes a rotating 3-facet prism, remote focus, and iris.

- Features**
- Compact, moving yoke fixture with a prism and motorized focus
 - Precision-designed optics for hard-edged effects
 - Extremely quiet for operation in any situation
 - Color wheel:
 - 8 colors + Open (white)
 - Split/linear colors
 - Rainbow color spin at variable speed
 - Gobo wheel 1:
 - 7 slot-n-lock gobos + Open
 - Indexed, rotating gobo wheel with gobo shake
 - Interchangeable
 - Gobo wheel spin at variable speed
 - Gobo wheel 2:
 - 8 gobos + Open
 - Gobo wheel spin at variable speed
 - 3-facet rotating prism
 - DMX channels: 16 or 19
 - Pan: 540°
 - Tilt: 250°
 - Reset over DMX
 - Electronic power supply
 - 3- and 5-pin DMX input and output connectors
 - RDM enabled for remote addressing and trouble shooting
 - Selectable LED maximum output to match legacy Rogue R1 Spots
 - Selectable PWM settings to maintain flicker free operation on camera

3. SETUP

AC Power

Each Rogue R1X Spot has an auto-ranging power supply that works with an input voltage range of 100 to 240 VAC, 50/60 Hz. To determine the power requirements for each Rogue R1X Spot, refer to the label affixed to the product. You can also refer to the [Technical Specifications](#) chart in this manual.

The listed current rating indicates the maximum current draw during normal operation. For more information, you may download Sizing Circuit Breakers from the Chauvet website: www.chauvetprofessional.com.

Remote Device Management (RDM)

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer as not all DMX controllers have this capability. The Rogue R1X supports RDM protocol that allows feedback to make changes to menu map options.

- **Always connect this product to a protected circuit with an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

Never connect this product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The Rogue R1X Spot comes with a power input cord terminated with a Neutrik® powerCON® A connector on one end and an Edison plug on the other end (U.S. market). If the power input cord that came with your product has no plug, or if you need to change the Edison plug, use the table below to wire the new plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Fuse Replacement

1. Disconnect this product from the power outlet.
2. Using a flat-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse and replace with a another fuse of the same type and rating (F 4 A, 250 V).
4. Screw the fuse holder cap back in place and reconnect power.

Make sure to disconnect the product's power cord before replacing a blown fuse. Always replace the blown fuse with another of the same type and rating.

Power Linking

The Rogue R1X Spot supports power linking. You can power link up to 6 products at 120 V; up to 12 at 208 V; or up to 13 at 230 V.

This product comes with a power input cord. Power linking cables are available from Chauvet for purchase.

DMX Linking

You can link the Rogue R1X Spot to a DMX controller using a 3- or 5-pin DMX connection. If using other DMX-compatible products with the Rogue R1X Spot, you can control each individually with a single DMX controller.

DMX Personalities

The Rogue R1X Spot uses a 3- or 5-pin DMX data connection for the 16- and 19-channel DMX personalities.

- Refer to the [Introduction](#) chapter for a brief description of each DMX personality.
- Refer to the [Operation](#) chapter to learn how to configure the Rogue R1X Spot to work in these personalities.
- The [DMX Values](#) section provides you with detailed information regarding the DMX personalities.

If you are not familiar with or need more information about DMX standards, Master/Slave connectivity, or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

Gobo Wheel The Rogue R1X Spot includes two gobo wheels: 7 rotating gobos plus open on wheel 1 and 8 fixed gobos plus open on wheel 2. The diagram shows the gobo number on the wheel, as numbered in the [DMX Values](#) tables.

Gobo holders 5 and 6 on gobo wheel 1 are slightly smaller to accommodate glass gobos (see below).

Gobo Replacement

The gobos in the Rogue R1X Spot gobo wheel 1 are removable from their gobo holders. This operation is quite simple, although it requires the technician to be careful and to follow the recommended procedure.

- **Make sure to disconnect the product's power cord before replacing a gobo**
- **Always replace a gobo with a gobo of the same dimensions.**
- **When inserting a glass gobo, always make sure that the shiny side of the gobo (glass base) faces the lamp. This provides a layer of protection against the high temperature from the lamp.**
- **All custom gobos in the Rogue R1X Spot gobo wheel 1 must be aluminum or glass.**

Procedure

1. Turn the product off and disconnect it from the power outlet.
2. Open the head cover by loosening the 4 Phillips-head ¼-turn screws on the sides of the top cover.
3. Separate the gobo holder away from the gobo wheel by pushing it toward the front of the moving head (direction 1 in the diagram). Be careful not to push the gobo out of the gobo holder.
4. Extract the gobo holder by pulling it outward (direction 2 in the diagram).
5. On a flat surface, remove the expansion ring that holds the gobo in place and remove the gobo from the gobo holder.
6. Insert a new gobo and hold it in place with the expansion ring.
7. Slide the tip of the gobo holder under the pressure plate near the center of the gobo wheel.
8. Push the gobo holder inwards. DO NOT force the gobo holder into the gobo wheel slot. If correctly installed, the gobo plate should easily slide itself into the gobo wheel slot.

Gobo Replacement Diagrams

Gobo Wheel 2

The gobos on gobo wheel 2 are not removable.

Color Wheel

The Rogue R1X Spot includes a color wheel with 8 fixed colors plus open (white) as indicated below. The diagram shows the color names on the wheel, as shown in the [DMX Values](#) tables.

Mounting Before mounting this product, read and follow the [Safety Notes](#). For our Chauvet line of mounting clamps, go to <http://trusst.com/products/>.

Orientation Always mount this product in a safe position and make sure there is adequate room for ventilation, configuration, and maintenance.

Rigging Chauvet recommends using the following general guidelines when mounting this product.

- When selecting an installation location, consider easy access to this product for operation, programming adjustments, and routine maintenance.
- Make sure to mount this product away from any flammable material as indicated in the [Safety Notes](#).
- Never mount in places where rain, high humidity, extreme temperature changes, or restricted ventilation may affect the product.
- If hanging this product, make sure that the mounting location can support the product's weight. See the [Technical Specifications](#) for the weight-bearing requirements of this product.
- When hanging this product, always secure to a fastening device using a safety cable.

Procedure The Rogue R1X Spot comes with a preinstalled mounting surface to which you will be able to attach the 2 included omega brackets. Make sure the clamps are capable of supporting the weight of this product. Use two mounting points per product. In addition, use a safety cable to link the product to the structure.

Mounting Diagram

4. OPERATION

Control Panel Description

Button	Function
<MENU>	Exits from the current menu or function
<ENTER>	Enables the currently displayed menu or sets the currently selected value in to the current function
<UP>	Navigates upward through the menu list or increases the numeric value when in a function
<DOWN>	Navigates downward through the menu list or decreases the numeric value when in a function

Control Options

You can set the Rogue R1X Spot starting address in the **001–512** DMX range. This enables control of up to 26 products in the 19-channel **19CH** personality.

Programming

Refer to the [Menu Map](#) to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To enter programming mode, press any key on the control panel to wake the opening screen. Press <MENU> until you see one of the main level options.
- To highlight a menu option or to change a setting, press <UP> or <DOWN>.
- To change menu levels as shown in the [Menu Map](#), press <ENTER> or <MENU>. This is equivalent to moving right and left of the Menu Map, respectively.
- To accept the current or new value, press <ENTER>.
- To return to the previous menu without making changes, press <MENU>.
- To exit programming mode, press <MENU> until you see one of the main level options, the opening screen, or do not press any button for 30 seconds and the screen will automatically revert to the opening screen.

Menu Map

Refer for the Rogue R1x Spot product page on <http://www.chauvetprofessional.com> for the latest menu map.

Sys Info	Ver:			Displays the software version
	Running Mode:			Displays the current running mode
	Dmx Address:			Displays the current DMX address
	Temperature:			Displays the product's temperature in Celsius
	UID:			Displays product's UID

Address This programming level sets the DMX starting address.

- Starting from the Main Level screen, select **Address**, press **<ENTER>**.

Set the DMX Address In this mode, each product will respond to a unique starting address from the DMX controller. All products with the same starting address will respond in unison. This option sets the products DMX address.

- Change the starting address (**001–512**), press **<ENTER>**.

Run Mode This programming level sets the DMX personality and controls the different test modes.

- Starting from the Main Level screen, select **Run Mode**, press **<ENTER>**.

DMX Personality This option selects which DMX Personality the product uses.

1. Highlight **DMX**, press **<ENTER>**.
 2. Select the DMX personality **16CH** or **19CH**, press **<ENTER>**.
- See the [DMX Values](#) section for the highest starting address you can select for each personality.
 - Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Auto Test This option runs every attribute individually through 1 cycle.

- Highlight **Auto Test**, press **<ENTER>**.

The Auto Test will end after 1 full cycle. You can stop the test by pressing <MENU> at any time.

Manual Test This option allows you to run each attribute individually or as a group.

1. Highlight **Manual Test**, press **<ENTER>**.
2. Highlight the desired attribute listed on the control panel screen, press **<ENTER>**.
 - Set the attribute value (**000–255**), press **<ENTER>**.
3. Repeat step 2 for the other attributes.

When exiting the Manual Test level, the values of all tested channels will go back to zero.

- Setup** This programming level controls the product's head movement, lamp adjustments, and maintenance timer.
- Starting from the Main Level screen, select **Setup**, press **<ENTER>**.
- Pan Reverse** Reverses the operation of the pan attribute.
- Highlight **Pan Reverse**, press **<ENTER>**.
 - Select **YES** or **NO**, press **<ENTER>**.
- Tilt Reverse** Reverses the operation of the tilt attribute.
- Highlight **Tilt Reverse**, press **<ENTER>**.
 - Select **YES** or **NO**, press **<ENTER>**.
- Screen Reverse** To invert the control panel screen:
- Highlight **Screen Reverse**, press **<ENTER>**.
 - Select **YES** or **NO**, press **<ENTER>**.
- Pan Angle** This option assigns pan range.
- Highlight **Pan Angle**, press **<ENTER>**.
 - Select **540**, **360**, or **180**, press **<ENTER>**.
- Tilt Angle** This option assigns tilt range.
- Highlight **Tilt Angle**, press **<ENTER>**.
 - Select **90**, **180**, or **270**, press **<ENTER>**.
- Pan and Tilt Movement BlackOut** This option engages the shutter to block all light output whenever the product's head is in motion.
- Highlight **BL.O.P/T Move**, press **<ENTER>**.
 - Select **YES** or **NO**, press **<ENTER>**.
- Color Movement BlackOut** This option engages the shutter to block all light output whenever the product's color wheel is in motion.
- Highlight **BL.O.ColorMove**, press **<ENTER>**.
 - Select **YES** or **NO**, press **<ENTER>**.
- Gobo Movement BlackOut** This option engages the shutter to block all light output whenever the product's gobo wheel is in motion.
- Highlight **BL.O.GoboMove**, press **<ENTER>**.
 - Select **YES** or **NO**, press **<ENTER>**.
- LED Frequency** This option changes the Pulse Width Modulation (PWM) frequency of the LEDs on the Rogue R1X Spot.
- Go to the **PWM Option** main level.
 - Choose an output frequency. (**600Hz**, **1200Hz**, **6000Hz**, or **15KHz**).
- LED Power** This option enables the product to match the light intensity of the original Rogue R1 Spot.
- Go to the **LED POWER** main level
 - Choose the LED intensity (**50-100**).

- Reset Function** This programming level allows the user to reset individual functions to the home position.
- Starting from the **Setup** screen level, select **Reset Function**, press **<ENTER>**.
- Pan/Tilt Reset** This option resets the Pan/Tilt functions to the home position.
1. Highlight **Pan/Tilt**, press **<ENTER>**.
 2. Select **YES** or **NO**, press **<ENTER>**.
- Prism Reset** This option resets the Prism functions to the home position.
1. Highlight **Prism**, press **<ENTER>**.
 2. Select **YES** or **NO**, press **<ENTER>**.
- Color Reset** This option resets the Color functions to the home position.
1. Highlight **Color**, press **<ENTER>**.
 2. Select **YES** or **NO**, press **<ENTER>**.
- Gobo&R/Gobo2 Reset** This option resets the Gobo&R/Gobo 2 functions to the home position.
1. Highlight **Gobo&R/Gobo2**, press **<ENTER>**.
 2. Select **YES** or **NO**, press **<ENTER>**.
- Focus/Iris Reset** This option resets the Focus/Iris functions to the home position.
1. Highlight **Focus/Iris**, press **<ENTER>**.
 2. Select **YES** or **NO**, press **<ENTER>**.
- All Reset** This option resets the all the functions to the home position.
1. Highlight **All**, press **<ENTER>**.
 2. Select **YES** or **NO**, press **<ENTER>**.
- Factory Reset Function** This reverts the product back to its original factory settings.
1. Starting from the **Setup** screen level, select **Factory Settings**, press **<ENTER>**.
 2. Select **YES** or **NO**, press **<ENTER>**.

System Information

This programming level shows standard information regarding the product's operating status.

- Starting from the Main Level screen, select **Sys Info**, press **<ENTER>**.
 - **Ver:** The current software version is displayed on the screen.
 - **Running Mode:** The current Running mode is displayed on the screen.
 - **DMX Address:** The current DMX address is displayed on the screen.
 - **Temperature:** The current product temperature is displayed on the screen.

RDM This option shows the product's UID #. The UID # is used when using the RDM functionality of the product

1. Go to the Information main level.
2. Select UID: and the number will show on the screen.

Use DMX configurations to operate the product with a DMX controller.

Offset Mode

The Offset mode provides fine adjustments for the home position of all the moving parts in the optical path as well as the pan and tilt movements. This way, when in their home position, the moving parts do not show any border or reduce the light output.

1. Starting from the Main Level screen, press and hold **<MENU>** until the passcode screen appears.
2. Using **<UP>** to increase the number value and **<DOWN>** to move to the next column, enter **2323**, press **<ENTER>**. This brings you into the Zero Adjust menu screen.

- Pan**
1. Highlight **PAN**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Tilt**
1. Highlight **TILT**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Gobo**
1. Highlight **GOBO**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Gobo Rotate**
1. Highlight **GOBO ROT**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Gobo 2**
1. Highlight **GOBO2**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Color 1**
1. Highlight **COLOR1**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Color 2**
1. Highlight **COLOR2**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Prism**
1. Highlight **PRISM**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Focus**
1. Highlight **FOCUS**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Iris**
1. Highlight **IRIS**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Frost**
1. Highlight **FROST**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

- Dimmer**
1. Highlight **DIMMER**, press **<ENTER>**.
 2. Select **000–255**, press **<ENTER>**.

FO. Yellow Edge Reserved for future use.

5. TECHNICAL INFORMATION

Product Maintenance

To maintain optimum performance and minimize wear, you should clean this product frequently. Usage and environment are contributing factors in determining the cleaning frequency.

As a rule, clean this product at least twice a month. Dust build-up reduces light output performance and can cause overheating. This can lead to reduced light source life and increased mechanical wear.

To clean your product:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents.
4. Clean all external surfaces with a mild solution of non-ammonia glass cleaner or isopropyl alcohol.
5. Apply the solution directly to a soft, lint-free cotton cloth or a lens cleaning tissue.
6. Wipe any dirt or grime to the outside edges of the lens surface.
7. Gently polish the lens surfaces until they are free of haze and lint.

Always dry the external surfaces thoroughly and carefully after cleaning them.

Do not allow the cooling fans to spin while blowing compressed air into the fixture.

Returns You must send the product prepaid, in the original box, and with the original packing and accessories. Chauvet will not issue call tags.
Call Chauvet and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause(s) for the return.
Clearly label the package with an RMA number. Chauvet will refuse any product returned without an RMA number.

DO NOT write the RMA number directly on the box. Instead, write it on a properly affixed label.

Once you have received the RMA number, include the following information on a piece of paper inside the box:

- Your name
- Your address
- Your phone number
- The RMA number
- A brief description of the problem(s)

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be the customer's responsibility. FedEx packing or double-boxing is recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned product(s).
